

17) PHP form validation :

→ form validation

for example : o/p :

Name :

Email :

website :

Comment :

Gender : ☐ male
☐ female
☐ other

✱ It contains the various input field required
and optional text field

✱ Radio button is called as an optional

not Relat.

* And using Radio button and Submit Button.

PROGRAM :

<html>

<head></head>

<body>

<? php

// Define variables and set to Empty values → ①

\$name = \$email = \$gender = \$Command = \$

website = " " ;

② <? if (\$_SERVER ["request_method"] == ("POST"))

{
③ <? \$name = text_input (\$_POST ["name"]);
\$email = text_input (\$_POST ["email"]);
\$gender = text_input (\$_POST ["gender"]);
\$Command = text_input (\$_POST ["Command"]);
\$website = text_input (\$_POST ["website"]);

function text_input → ④
(\$Data)

name : <input type = "text" name = "name" />

email : <input type = "text" name = "email" />

website : <input type = "text" name = "web" />

gender : <input type = "radio" name = "gender" value =
"male" />

<input type = "radio" name = "gender" value =
"female" />

comment : <input type="text" area

name="com" />

<input type="submit" />

</body>

</html>

<? php

echo <h2>

echo & name

echo & "br">

echo & email

echo <"br">

echo & website

echo <"br">

echo & comment

echo <"br">

echo & gender

echo <"br">

?>

Output:

Your Input
