Q1.  The number of 5 digit odd numbers that can be made from number 12345 are

120

96

56

72

Q2. The product of a number and its multiplicate inverse is

-1

0

1

none

Q3. Find X: $(\frac{2}{7})^{-8} (\frac{7}{2})^{-2} = (\frac{2}{7})^{2x}$

3

- 3

-6

2

Q4. From a group of 8 men and 8 women 8 members are to be selected for a team such that women constitute at least 50% of th team in how many ways can it be done?

$$8c4 * 8c4 + 8c5 * 8c3 + 8c6 * 8c2 + 8c7 * 8c1 + 8c8$$

$$84 * 84$$

$$8c4 * 8c4$$

$$84 * 84 + 83 * 85 + 82 * 86 + 87 * 8 + 1$$

Q5. In howmany different ways can the letter of the word OPTICAL be arranged so that the vowels always come together?

120

720

4320

2160

none of these

Q6. Mathi purchased a watch man from her friend. She then told it for Rs.90.Had it been sold for Rs.105. The gain would have been 1/4 Of the former loss. What is cost price of the walkman?

82

102

114

126

Q7. A software Engineer creates a LAN game where an five digit code made up of 1,2,3,4,5,6,7,8 has to be decided on as a universal code. There is a condition that each number has to be used and no number can be repeated. What is the probability that first 4 digit of a code are even numbers?

1/70

1/840

1/8

1/40320

Q8. A quiz has one multiple choice question with a answer choices A,B and C ,and two true or false questions. What is the probability answering all questions correctly by guessing?

1/5

1/4

1/3

1/12

Q9. A women sold 15 bed sheets for Rs.15,000.hence gaining the cost price of bed sheets. The cost per sheet is

rs.960

rs.775

rs.1000

rs.800

rs.750

Q10. How many toffees were distributed in total among ankit,aniket and anuj in the ratio 2:3:7,if aniket receives 84 toffees in total?

300

312

324

336

345

Q11. The question is based on the following information
1. 8-trees -->mango, guava, papaya, pomegranate, lemon, banana, raspberry and apple are in two rows 4 in each facing North and South.
2. Lemon is between mango and apple but just opposite to guava.
3. Banana is at one end of a line and is just next in the right of guava or either banana tree is just after guava tree.
4. Raspberry tree which at one end of a line, is just diagonally
Question:
Which of the following statements is definitely true?

Papaya tree is just near to apple tree.

Apple tree is just next to lemon tree.

Raspberry tree is either left to Pomegranate or after.

Pomegranate tree is diagonally opposite to banana tree.

Q12. The causes of productivity loss are to be written around a circle in the annual report.In how many ways can an analyst write th around the circle.if the no of coueses are 5?

5!

5C5

5P5

4!

4C4

Q13. Ravi has a bag full of 10 nestle and 5 cadbury chocolates.Out of these, he draws two chocolates.what is the probability that he would get at least one nestle chocolate?

19/21

3/7

2/21

1/3

Q14. Ram and Ravi were playing with a paper phone, frustums of which are attached to each other by 95 m long string. If both start moving in opposite directions at a speed of 18 m/min and 20 m/min respectively, after how many minutes will both have to stop?

2.5min

2min

3 min

4 min

Q15. A television manufacturing company has decided to increase the sale to beat the economic slowdown. It decided to reduce the price of television sets by 25% as a result of which the sales increased by 20%. What is the effect on the total revenue of the company?

A. Decreased by 20%

B. Increased by 20%

C. Increased by 10%

D. Decreased by 10%

Q16. The boss accepts only one employees leave request for a particular day. if five employer name Ronak, Mahesh, Shripal, Moha, and Shreyansh applied for the leave on the occasion of Ganesh Chaturthi, what is the probability that Ronak?s leave request will be

approved?

2/3

1

4/5

1/5

Q17. A pie has to be divided amongst few kids.Punith gets 2/7 th portion of the pie and sheila gets 5/8th portion of the pie.who amongst the two gets lesser share?

A. Punith

B. Shella

C. Both gets equal share

D. Cannot be determined

Q18. find the value of x: $0.009/x = 0.01$

0.0009

0.09

0.9

9

Q19. For the smallest number that should be multiplied with 54000 to make it a perfect cube?

4

27

5

3

Q20. 4 men can construct a road in 7 days. How many men should be needed to complete the work in 2 days?

12 men

10 men

14 men

8 men

Q21. Find the probability of even numbers that can be possible only with 1,2,3,4 in 4 digits?

a. $\frac{1}{4}$

b. $\frac{1}{16}$

c. $\frac{1}{2}$

d. $\frac{1}{12}$

Q22. find the least number which when divided by 5,8 and 19 leaves remainders 2,5 and 16 respectively?

747

757

760

767

763

Q23. what is the value of expression : $5 * (2 + 16) / 2 - 4 * (2 + 2) + \frac{1}{4}$ of 16?

26

13

34

33

Q24. Find the probability of forming 4 digits number using 1,2,3,4,5,6,7,8 without any repetition?

50

60

70

80

90

Q25. Find the Decimal number: (10101)₂

19

Necessary

Basic

Q3. Fill in the blank with the word that is OPPOSITE in meaning to the word given in bold. Anita was not happy with the bank's interest rate policy. They offered a fixed rate on all loans while she wanted a _____ rate.

Moving

Floating

Free

Market

Q4. Read the passage and answer the questions given below
Urban Zen: As different and conflicting as those contrasting worlds are, however, bringing them together makes perfect sense to Donna Karan. The designer's latest passion, the Urban Zen Foundation, a New York City-based philanthropic organization that she created in 2007, is all about exploring the intersection between the complex reality of our busy lives and the simplicity and focus of a more spiritual existence. "It's about finding the calm in the chaos," she is fond of saying. The quest for that balance has taken Karan far from her studios on Seventh Avenue and landed her in the middle of a cancer ward at Beth Israel Hospital on Manhattan's east side. Through the foundation, Karan has transformed an entire floor of the hospital into a living laboratory to test the idea that integrative therapies, such as aromatherapy, massage and yoga, can improve patient experiences in the hospital and possibly even better help people heal. For Karan, taking on the role of alternative health-care ambassador is a perfectly logical step. A born entrepreneur who has always followed her instincts, she has become a leader in the fashion community not only for her work in design but also for her broader perspective. From the Seven Easy Pieces collections she designed in the 1980s, which gave professional women a solution to the daily conundrums of the modern world, to her linking of commerce with a cause when she conceived of Seventh on Sale, an annual sample sale of the industry's most coveted labels to help those living with HIV. Always energetic, often to the point of frenetic nervousness, Karan is described by those who know her best as "passionate," "wild," "insane" and, at times, "cuckoo." It's no surprise, then, that the runways have never been able to contain the Queens-born Karan. She still ends the program notes of her shows with the phrase "To be continued," reflecting her conviction that her education in style, design and inspiration is an ever evolving process. One that often takes her far beyond runways and studios. Well traveled, Karan is passionate about learning, particularly studying different cultures and disciplines. Fascinated by Eastern philosophies on spirituality, the longtime yoga devotee is now consumed with exploring the world of integrative medicine, an emerging field that combines traditional medical practices with those that are still considered a bit fringe. Meditation, yoga, massage and aromatherapy, by most members of the medical community. Which of the statements is true about the field of integrative medicine?

only yoga devotees can understand the importance of this field

yoga and meditation are used along with proper medication

it provides healing powers to patients

It focuses on spiritual path of living

Q5. Antonym : EMPATHY

Care

Sympathy

Discontent

Indifference

Q6.

Antonym : SPLENDID

Unimpressive

Bad

Ugly

Radiant

Q7. Read the passage and answer the questions given below From the dawn of time, people have suspected powerful forces lurking deep in the oceans ? from the Greeks' fearsome sea-god Neptune to John Wyndham's submarine aliens in his 1950s novel The Kraken Wakes. But science is once again going one better than science fiction. Researchers are discovering that hidden 'rivers' run through the oceans, and these powerful currents hold the destiny of our planet's climate. The beneficial aspects of ocean currents have long been known. For countries on the east side of the Atlantic, winters are a balmy holiday compared with the same latitudes on the west: the frigid coasts of Newfoundland and Labrador. It's a reminder that "weather" is not just a matter of the Sun's heat affecting the Earth's atmosphere. The world's interconnected oceans can store up solar heat in one part of the globe in one season, and invisible rivers in the ocean can transport the warmth thousands of kilometres to another part of the globe and deliver it in another season. In the case of the North Atlantic, heat is carried northward and eastward by the Gulf Stream. This current warms the coast evenly through the year, in winter as well as summer. Averaged over a year, the Gulf Stream provides Western Europe with a third as much warmth as the Sun does. This ocean warmth is so important to Europe that climatologists are seriously concerned about the stability of the Gulf Stream. If it switched off, Europe would be plunged into a mini-Ice Age. And current studies suggest that the unseen river in the North Atlantic is dangerously fickle. The focus of today's worries is the problem of global warming - the way that human activities are changing the climate, as the world gets warmer through the build-up of so-called greenhouse gases, such as carbon dioxide. Climatologists think that global warming may put the brakes on the Gulf Stream. While the rest of the world comes to swelter in greenhouse conditions, Europe would freeze! This concern is based on a new understanding of how the great ocean currents are all interconnected. The Gulf Stream is part of a giant pattern of moving water that stretches right around the globe. D.What is the role of ocean currents in maintaining the weather conditions?

It helps in maintaining cold temperature in warmer regions

It balances the effect of sun?s heat

It stores heat and warms distant places

Unpredictable currents can create an imbalance in water temperature

Q8. Antonym : SORROW

Sympathy

Joy

Woe

Empathy

Q9. Antonym : GRATIFY

Oblige

- Humor
- Indulge
- Upset

Q10. Antonym : IMMINENT

- Impending
- Eminent
- Pending
- Distant

Q11. Antonym : DISPARITY

- Timidity
- Bigotry
- Likeness
- Influence

Q12. Read the passage and answer the questions given below. Class and money has always strongly affected how people do in life in Britain, with well-heeled family breeding affluent children just as the offspring of the desperately poor tend to be poor. All that supposed to have ceased by the end of the Second World War, with the birth of welfare state designed to meet basic needs and promote social mobility. But despite devoting much thought and more money to improve the lot of the poor, governments have failed to boost those at the bottom of the pile as much as those on top of the pile have boosted themselves. Although the study found that some of the widest gaps between social groups have diminished over time (between men and women on pay, for example, and between various ethnic minorities), deep-seated differences between haves and have-nots persist,blighting the life chances of the less fortunate. Looking at earnings, income, education, employment or wealth, a similar pattern emerges. By the age three, a poor child is outperformed in verbal ability and behavior by a rich one. Much of this difference is explained by ethnicity: unsurprisingly, poor children who do not speak English at home know fewer words in what is their second or third language. A child?s ethnicity becomes less important as he grows: by the age of 16, bright Chinese and Indian students are performing extremely well at school. But throughout his classroom career how well a child does is dominated by how highly educated his parents are and how much money they bring home. Politicians of all stripes talk about equality of opportunity, arguing that it makes for a fairer and more mobile society, and a more prosperous one. The difficulty arises in putting these notions into practice, through severe tax increases for the middle-class and wealthy, or expanding government intervention. B) In the context of the passage , what is the meaning of the term ?blighting??

- Ruining
- Improving
- Illuminating
- Imbalancing

Q13. Synonym : TRUST

- Insincere
- Faith
- Lie
- Tease

Q14. Synonym : EMPLOY

- Ignore
- Satire
- Use
- Busy

Q15. Read the passage and answer the questions given below. Research has found that more than 85 percent of college students feel increased stress and anxiety at exam time, and that number is likely even higher during their first time around. But there are many ways parents can help their students manage exam stress, including those that not only improve their ability to perform on the tests, but also help them stay healthy in the process. One of the first things parents can do to help their students through their first round of exams is to make sure they don?t wait until the last minute to prepare. As soon as the exam dates are determined, help them organise a schedule to stay on top of their work, and provide gentle reminders throughout the semester to make sure they don?t procrastinate. If you?re too far away for face-to-face time, send study aids to help them get as relaxed and ready as possible. Help them avoid the typical exam-time habit of too much junk food and caffeine with a package filled with healthy snacks. A classical music CD will provide a calm study atmosphere, and a yoga DVD will help them stay relaxed and composed. Finally, be sure to remember how important love and support are to your student. Offering support is as simple as acknowledging the stress they are feeling. Help your student keep a positive attitude, and remind him or her that the first round of exams is not likely to make or break their entire college career. It will all go a long way in helping your student become as relaxed and ready as possible. B. How can a parent help if he or she is far away from the child?

- Talk regularly and provide guidance
- Persuade them to attend group study
- Give self-help books to instill a sense of purpose and motivation
- Send CD?s and other useful things to help stay calm and focused

Q16. Synonym : SWAP

- Take form
- Exchange
- Back off

- Q17. Read the passage and answer the questions given below. Research has found that more than 85 percent of college students feel increased stress and anxiety at exam time, and that number is likely even higher during their first time around. But there are many ways parents can help their students manage exam stress, including those that not only improve their ability to perform on the tests, but also help them stay healthy in the process. One of the first things parents can do to help their students through their first round of exams is to make sure they don't wait until the last minute to prepare. As soon as the exam dates are determined, help them organize a schedule to stay on top of their work, and provide gentle reminders throughout the semester to make sure they don't procrastinate. If you're too far away for face-to-face time, send study aids to help them get as relaxed and ready as possible. Help them avoid the typical exam-time habit of too much junk food and caffeine with a package filled with healthy snacks. A classical music CD will provide a calm study atmosphere, and a yoga DVD will help them stay relaxed and composed. Finally, be sure to remember how important love and support are to your student. Offering support is as simple as acknowledging the stress they are feeling. Help your student keep a positive attitude, and remind him or her that the first round of exams is not likely to make or break their entire college career. It will all go a long way in helping your student become as relaxed and ready as possible. In what way can a parent offer unconditional support to a child?

Let the child plan his exam study entirely on his own

Spend quality time taking long walks and doing things of common interest

Support and encourage while helping the child to be relaxed.

Strategize and plan for a successful career ahead.

- Q18. Read the passage and answer the questions given below. The stratosphere?specifically, the lower stratosphere?has, it seems, been drying out. Water vapour is a greenhouse gas, and the cooling effect on the Earth's climate due to this desiccation may account for a fair bit of the slowdown in the rise of global temperatures seen over the past ten years. The stratosphere sits on top of the troposphere, the lowest, densest layer of the atmosphere. The boundary between the two, the tropopause, is about 18 km above your head, if you are in the tropics, and a few kilometres lower if you are at higher latitudes (or up a mountain). In the troposphere, the air at higher altitudes is in general cooler than the air below it, an unstable situation in which warm and often moist air below is endlessly buoying up into cooler air above. The resultant commotion creates clouds, storms and much of the rest of the world's weather. In the stratosphere, the air gets warmer at higher altitudes, which provides stability. The stratosphere?which extends up to about 55 km, where the mesosphere begins?is made even less weather-prone by the absence of water vapour, and thus of the clouds and precipitation to which it leads. This is because the top of the troposphere is normally very cold, causing ascending water vapour to freeze into ice crystals that drift and fall, rather than continuing up into the stratosphere. A little water manages to get past this cold trap. But as Dr Solomon and her colleagues note, satellite measurements show that rather less has been doing so over the past ten years than was the case previously. Plugging the changes in water vapour into a climate model that looks at the way different substances absorb and emit infrared radiation, they conclude that between 2000 and 2009 a drop in stratospheric water vapour of less than one part per million slowed the rate of warming at the Earth's surface by about 25%. Such a small change in stratospheric water vapour can have such a large effect precisely because the stratosphere is already dry. It is the relative change in the amount of a greenhouse gas, not its absolute level, which determines how much warming it can produce. B. Why is the situation in the troposphere defined as unstable?

Because, unlike the stratosphere, there is too much water vapour in the troposphere

Because the troposphere is not directly linked to the stratosphere, but through the tropopause which creates much of their world's weather.

Because of the interaction between warm and cool air which is unpredictable in nature and can lead to storms

Because this layer of the atmosphere is very cloudy and can lead to weather related disruptions

- Q19. Synonym : LUMINOUS

Transparent

- Dull
- Glowing
- Lame

Q20. Synonym : NOMINAL

- Significant
- Minimal
- Actual
- Dear

Q21. Read the passage and answer the questions given below. India lives in several centuries at the same time. Somehow we manage to progress and regress simultaneously. As a nation we age by pushing outward from the middle adding a few centuries on either end of the extraordinary CV. We greatness like the maturing head of a hammerhead shark with eyes looking in diametrically opposite directions. I don't mean to put a simplistic value judgement on this peculiar form of 'progress' by suggesting that Modern is good and Traditional is Bad or vice versa. What's hard to reconcile oneself to, both personally and politically, is the schizophrenic nature of it. That applies not just to the ancient/modern conundrum but to the utter illogic of what appears to be the current national enterprise. In the lane behind my house, every night I walk past road gangs of emaciated labourers digging a trench to lay fiber-optic cables to speed up our digital revolution. In the bitter winter cold, they work by the light of a few candles. It's as though people of India have been rounded up and loaded onto two convoys of trucks (a huge big one and a tiny little one) that have set off resolutely in opposite directions. The tiny convoy is on its way to a glittering destination somewhere near the top of the world. The other convoy just melts into the darkness and disappears. A cursory survey that tallies the caste, class and religion of who gets to be on which convoy would make a good lazy person's concise guide to the history of India. For some of us, life in India is like being suspended between two of the trucks, one leg in each convoy, and being neatly dismembered as they move apart, not bodily, but emotionally and intellectually. Sixty years after independence, India is still struggling with the legacy of colonialism, still flinching from the 'cultural insult'. As citizens we are still caught up in the business of 'disproving' the white world's definition of us. Intellectually and emotionally, we have just begun to grapple with communal and caste politics that threaten to tear our society apart. But meanwhile, something new looms on our horizon. On the face of it, it's just ordinary, day-to-day business. It lacks drama, the large-format, epic magnificence of war or genocide or famine. It's dull in comparison. It makes bad TV. It has to do with boring things like jobs, money, water supply electricity, irrigation. But it also has to do with a process of barbaric dispossession on a scale that has few parallels in history. You may have guessed by now that I'm talking about the modern version of globalization. What is globalization? Who is it for ? What is it going to do a country like India, in which social inequality has been institutionalized in the caste system for centuries? Is the corporatization and globalization of agriculture, water supply, electricity and essential commodities going to pull India out of the stagnant morass of poverty, illiteracy and religious bigotry? Is the dismantling and auctioning off of elaborate public sector infrastructure, developed with public money over the past sixty years, really the way forward? Is globalization going to close the gap between the privileged and the underprivileged, between the upper castes and the lower castes, between the educated and the illiterate? Or is it going to give those who already have a centuries-old head start a friendly helping hand? These are huge, contentious questions. The answers vary depending on whether they come from the villages and fields of rural India, from the slums and shantytowns of urban India, from the living rooms of the burgeoning middle class or from the boardrooms of the big business houses. B. What does the phrase 'cultural insult' imply?

- People from one culture do not respect people from the other cultures
- Disrespect of British towards Indian culture
- White people's definition for us
- Ill-treatment at hands of British

Answer Key & Solution

Section 1 - Quantitative Aptitude

Q1

72

Solution

There is a way to make this come out to one of the given answers and that is if you made an error when you listed the available digits. If

the available digits were 1, 2, 3, 4, and 5, then you would have $=4*3*2*1*3=72$

Q2

1

Solution

Q3

- 3

Solution

$$(2/7)^{-8} * (7/2)^{-2} = (2/7)^{2x}$$

As we know, $(2/7)^{-8} = (7/2)^8$

So, $(7/2)^8 * (7/2)^{-2} = (2/7)^{2x}$

$$(7/2)^{(8-2)} = (2/7)^{2x}$$

$$(7/2)^6 = (2/7)^{2x}$$

$$(2/7)^{-6} = (2/7)^{2x}$$

So, $2x = -6$

$$X = -3$$

Q4

$$8c4 * 8c4 + 8c5 * 8c3 + 8c6 * 8c2 + 8c7 * 8c1 + 8c8$$

Solution

Q5

720

Solution

PTCL(OIA) 5!=120 NO.OF WAYS=120*6=720

Q6 102

Solution

gain=sp-cp; loss=cp-sp los-cp=1/4(cp-gain) 510/4=5cp/4 510=5cp cp=102

Q7 1/70

Solution

NA

Q8 1/12

Solution

multiple choice answer got 3 option so probability of giving right answer is 1/3;regarding true/false answer is 1/2 and 1/2;so probability of correct answer is 1/2*1/2*1/3=1/12

Q9 rs.960

Solution

this can be done by using trial and error method if cost price is 960 then for 15 bedsheets=15*960=14400 cost of 15 bedsheets + cost of one bedsheet=14400+960=15000

Q10 336

Solution

2x:3X:7X ? :84:? 3X=84 X=84/3 X=28 2(28):3(28):7(28)=56+84+196=336

Q11 Apple tree is just next to lemon tree.

Solution

Q12 4!

Solution

Q12 none

Q13 19/21

Solution

Q14 2.5min

Solution

No Solution

Q15 D. Decreased by 10%

Solution

CP=100 MP=75 FP=120% OF 75 =90 HENCE DECREASE IN PRICE =100-90=10

Q16 1/5

Solution

TOTALLY 5 EMP SO PROBABILITY = 1/5

Q17 A. Punith

Solution

punitha=2/7x sheela=5/8x By comparing,punitha can get lesser share

Q18 0.9

Solution

NO

Q19 4

Solution

NO

Q2014 men

Solution

-

Q21d. 1/12

Solution

-

Q22757

Solution

WHEN DIVISIBLE BY ALL GIVEN NUMBERS 757 LEAVES THE GIVEN REMAINDER

Q2333

Solution

NO

Q2470

Solution

8c4=70

Q2521

Solution

convert to decimal

Section 2 - Verbal Ability

Q1

	Major
	Solution
	Nil
Q2	Avoidable
	Solution
	Nil
Q3	Floating
	Solution
	Nil
Q4	yoga and meditation are used along with proper medication
	Solution
Q5	Indifference
	Solution
	Nil
